

Contents

1. Introduction.....	- 2 -
1.1 Virtual Reality	- 2 -
1.2 Motivation.....	- 2 -
1.3 State of the Art.....	- 3 -
1.3.1 Previous work of Displaying Module	- 3 -
1.3.2 Previous Work on the Projection Module.....	- 6 -
1.4 Previous work on the Stereoscopy Module.....	- 9 -
1.5 Previous Work on the Sound Module.....	- 11 -
1.6 Research Design.....	- 13 -
2. Theoretical frame.....	- 17 -
2.1 Virtual Reality	- 17 -
2.1.1 General issues in the design of Virtual Environments.....	- 18 -
2.1.1.1 Physical and Virtual parts in a Virtual Environment -	18 -
2.1.1.2 Environments: Immersive and non-Immersive.....	- 19 -
2.1.1.3 Parallel or Perspective Projection.....	20 -
2.1.1.4 Interaction in the Virtual Environments.....	.21 -
2.1.2 Virtual Worlds.....	- 22 -
2.1.3 Example of Virtual Environments.....	- 22 -
2.1.4 Virtual Reality Applications.....	- 24 -
2.2 Stereoscopy.....	- 25 -
2.2.1 Vision Foundation.....	- 25 -
2.2.1.1 Monocular Depth Cues.....	- 26 -
2.2.1.2 Binocular Depth Cues	- 29 -
2.2.1.3 Vision Binocular Foundation.....	- 30 -
2.2.1.4 Limits of Depth Perception.....	- 31 -
2.2.2 A brief history of the Stereoscopy.....	- 31 -
2.2.2.1 Wheatstone-type Stereoscopic Device.....	- 32 -
2.2.2.2 Brewster-type Stereoscopic Device.....	- 33 -
2.2.2.3 Holmes-type Stereoscopic Device.....	- 34 -
2.2.2.4 Boxed-type Stereoscopic Device.....	- 34 -
2.2.2.5 Cazes-type stereoscopic Device.....	- 34 -
2.2.2.6 Stereoscopy in the 21st Century.....	- 35 -
2.2.3 Stereoscopic Techniques.....	- 36 -
2.2.3.1 Parallel Viewing or Wall Eyed.....	- 36 -
2.2.3.2 Crossed-Eye Viewing.....	- 36 -
2.2.3.3 View-Master.....	- 37 -
2.2.3.4 Head-Mounted Displays.....	- 37 -
2.2.3.5 LCD Shutter Glasses.....	- 38 -
2.2.3.6 Polarized Glasses.....	- 38 -
2.2.3.7 Two-color Anaglyph.....	- 39 -

	2.2.3.8 Wiggle Stereoscapy.....	- 40 -
	2.2.3.9 Autostereograms.....	- 40 -
	2.2.3.10 Pulfrich Effect	- 40 -
	2.2.3.11 Displays with Filter Arrays.....	- 41 -
2.3	Sound	- 41 -
	2.3.1 Acoustic Fundamentals.....	- 42 -
	2.3.1.1 Sound Waves	- 42 -
	2.3.1.2 Room Acoustics.....	- 44 -
	2.3.1.3 Psychoacoustics.....	- 45 -
	2.3.2 Monophonic Sound.....	- 48 -
	2.3.3 Stereophonic Sound.....	- 48 -
	2.3.4 Three Dimensional Sound.....	- 49 -
	2.3.5 Surround Sound	- 50 -
	2.3.5.1 Dolby Surround Sound or 3.0 Channel Surround Sound.	- 50 -
	2.3.5.2 Quadraphonic Sound or 4.0 Channel Surround Sound	- 51 -
	2.3.5.3 Variations of 5.1 Channel Surround Sound.....	- 51 -
	2.3.5.4 Variations of 6.1 Channel Surround Sound.....	- 52 -
	2.3.5.5 Variations of 7.1 Channel Surround Sound.....	- 53 -
	2.3.5.6 Channel Surround Sound.....	- 54 -
2.4	Summary.....	- 54 -

3 Mathematical description to the display of Virtual Environments..... - 58 -

3.1	Frustum.....	- 58 -
3.2	Real-World Screen Position.....	- 65 -
	3.2.1 Side by Side Screen.....	- 66 -
	3.2.2 Multiple non aligned Screens	- 69 -
3.3	Computing the Frustum of every Screen.....	- 70 -
3.4	Results.....	- 72 -
3.5	Summary.....	- 74 -

4 Mathematical description of the physical requirements to place a CAVE..... - 76 -

4.1	Tests with Projectors.....	- 76 -
4.2	Room Size.....	- 77 -
	4.2.1 Room design #1.....	- 77 -
	4.2.2 Room design #2.....	- 78 -
	4.2.3 Room design #3.....	- 79 -
	4.2.4 Room design #4.....	- 81 -
4.3	System	- 85 -
4.4	Summary.....	- 87 -

5	Proposed models for reconstituting/adapting three stereoscopes.....	- 90 -
5.1	Cazes -type computer-based Stereoscope.....	- 90 -
5.1.1	Stereoscope structure	- 93 -
5.1.2	Fine-tuning the Stereoscope.....	- 95 -
5.1.3	Software Implementation.....	- 96 -
5.1.4	Evaluating Cazes-type digital stereoscope.....	- 97 -
5.1.5	Results of the evaluation of the Cazes-type digital stereoscope	- 98 -
5.2	Wheatstone-type computer-based Stereoscope.....	- 98 -
5.2.1	Digital Stereoscope Design.....	- 99 -
5.2.2	Virtual Environment Design.....	- 100 -
5.2.3	Wheatstone stereoscope using projectors.....	- 101 -
5.2.4	Interacting in the Stereoscopic Environment.....	- 102 -
5.2.5	Evaluating Wheatstone-type digital stereoscope.....	- 103 -
5.2.6	Results.....	- 104 -
5.3	Boxed-type Digital Stereoscope.....	- 105 -
5.3.1	Building the Boxed-type Digital Stereoscope	- 105 -
5.3.2	Evaluating Boxed-type digital stereoscope.....	- 106 -
5.3.3	Results of the evaluation of the Boxed-type digital stereoscope	- 106 -
5.4	Summary.....	- 107 -
6	Three dimensional sound in Virtual Environments....	- 110 -
6.1	Three Dimensional sound as an Immersive tool in a Virtual World...-	111 -
6.2	Representation of 3D objects with 3D Sound	- 111 -
6.3	Manipulation and navigation of a Virtual world using 3D Sound.....-	112 -
6.4	Using OpenAL for incorporating 3D sound.....	- 114 -
6.5	Azimuth Angle.....	- 115 -
6.6	Elevation Angle.....	- 116 -
6.7	Attenuation.....	- 117 -
6.8	Doppler effects in our project	- 118 -
6.9	Incorporating 3D Sound into different Virtual Worlds.....-	118 -
6.10	Problems and solutions on incorporating Sound.....-	123 -
6.11	Summary.....	- 124 -
7	Proposed model for building adaptable Virtual Environments.....	- 127 -
7.1	Project scheme for building Virtual Environments.....-	128 -
7.1.1	Communication model.....	- 130 -
7.2	Used Software	- 130 -
7.3	Configurations.....	- 131 -

7.4	Navigating a Virtual Environment with different Input Devices.....	- 132 -
7.4.1	Manipulating the a Virtual World using a Remote Control.....	- 132 -
7.4.2	Manipulating a Virtual Environment considering of Viewer Position.....	- 133 -
7.4.3	Head-Tracker for hands-free navigation of a Virtual World using the user's movements in function of time.....	- 135 -
7.5	Evaluating a Virtual Environment built with two monitors forming a 90° angle.....	- 137 -
7.6	Results of evaluating a Virtual Environment built with two monitors.....	- 138 -
7.7	Comparative analysis with the previous work.....	- 139 -
7.8	Summary.....	- 142 -
8	Conclusions.....	- 145 -
	Index A. List of Figures.....	- 150 -
	Index B. List of Tables.....	- 155 -
	Index C. List of Equations.....	- 157 -
	References.....	- 162 -
