2. Adquisición de texto de Servicios Remotos Tema: La Informática en México

3. Adquisición de Imágenes en Servicios Remotos

Imagen Descargada

4. Aplicación de Operadores Suma de Imágenes

The screenshot displays the 'ImageTransformer' application interface. At the top, the title bar reads 'Browser: ImageTransformer'. The main workspace is divided into two sections. The left section contains two image thumbnails: a close-up of a metallic, blue-toned face and a close-up of a yellow eye with blue fur. Below these are 'Cargar' and 'Borrar' buttons. The right section contains a larger image of three people in a stone archway, with 'Cargar' and 'Borrar' buttons below it. In the center, a dropdown menu is set to 'Suma de Imagenes' and an 'Aplica' button is visible. On the left side of the interface, there are labels for 'Intervalo' and 'Umbral' with corresponding input fields. Below the main interface, the text 'Imagen Procesada' is followed by a right-pointing arrow. The bottom right of the image shows a preview of the processed image, which is a composite of the three original images.

5. Resultado en la aplicación de otros Operadores
