Subject: Snapshot Permission

Hi Dr. Ben, let me introduce myself, my name is Nabani Silva, im a student in UDLAP/ICT lab, im working on my thesis project using your great ideas about Visual Information Seeking (in specific Starfields and Dynamic Queries) in the approach to present an application for use in Digital Libraries. Dr. Alfredo Sanchez previously wrote you asking for some code I could use for my project. I'm glad to tell I'm using that surprising ideas. In my report im including a section explaining your work in relation with VIS, and id like to use some snapshots to show the interfaces of that work, concretely an image showing the AlphaSlider, one of Dynamic HomeFinder, and one of FilmFinder, ive taken that images of "Visual Information Seeking: Tight Coupling of Dynamic Query Filters with Starfield Displays" and from "The Alphaslider: A Compact and Rapid Selector" and im including full bibliographic reference to that articles, is there any copyright problem to do that?

The project is not yet finished but advances are available at:
<http://ict.udlap.mx/people/nabani>

Thank you so much.

Nabani
