

**Annex 2. Carbon Footprint Calculation.**

The carbon footprint calculation is based on information (and derived extrapolations) given by the Financial Management Department, the Office Management Department, and data obtained through the footprint survey conducted by the Waste-free Committee. It features emissions for the company’s Air Travel, Car Services, Employee Commute and Electricity consumption.

The calculation for electricity consumption emissions were based on the square footage and the geographic location of the office facilities as well as the amount of employees it houses.

Data was calculated using the Terrapass online carbon footprint calculator ([www.terrapass.com](http://www.terrapass.com)).

Emissions correspond to year 2007 and are expressed in carbon dioxide metric tons.

**Rapp Collins 2007 Emissions.**

<b>AIR TRAVEL</b>	<b>394.25</b>
<b>ELECTRICITY</b>	<b>584.41</b>
<b>CAR SERVICES</b>	<b>277.10</b>
<b>COMMUTE</b>	<b>192.15</b>

---

**TOTAL 1,447.90 CO<sub>2</sub> TONS**
