

APPENDIX V

PERCENTAGES OF FIGURINE CATEGORIES BY LAYERS

The following table may be used with the distribution plans, however it also includes information on the surface material. The figure numbers are given for figurines of each general category recovered on the surface or in each layer, and percentages given based on the total number of pieces in each category. For example, 5 hand modelled human heads were recovered on the surface. A total of 23 hand modelled human heads were recovered in the excavation (Appendix III). 5 is 21.74% of 23 (see next page). Percentages are not calculated for the stratigraphic pits because there are too few pieces. Figs. 24, 90, and 162 are not included in this table because their exact provenience is unknown.

<u>Item</u>	<u>Figure Number</u>	<u>Surface</u>	<u>Percentage</u>
Hand Modelled Human Heads	14	17	21.74%
