

# Acknowledgements

I would like to thank my entire family for their support and the education they gave me since I was child. They have always been my reason to do well in my personal and professional life. Mother Nadejda and father Maxim, I would like to express to you my gratitude, because you helped me so much to pursue my college education. I learned from you to be stronger and to achieve my goals and ambitions. Sister Ina, I have learned so many things from you, you showed me how to be a more relaxed person. Although you were so far away from me in the last years, I always think about you. Thanks for everything.

I would like to thank my advisor for making this thesis possible. Dr. Osorio, I had great experiences while I was working with you. Thank you for giving me the opportunity to be your student. I appreciate the attention, the suggestions and friendship that you gave me. I know you since my first year of undergraduate degree in the Universidad de las Américas-Puebla (UDLA). I was amazed by your ability to teach and work. You inspired me to continue my studies and to become a graduate student. I remember the seminars, the ACM contests, the courses and all the times you were teaching me. Thank you is not enough to express my appreciation.

Special thanks to Dr. Ingrid Kirschning and Dr. José Luis Zechinelli for being my co-advisors and teachers. Thanks a lot for your time, your efforts and kindness. And to all my professors in UDLA for their support.

I would like to thank my boyfriend for his constant help. Luis Edgar, you are my best friend and my love. I enjoy every day with you, even when we have to study hard. I learned from you to be more flexible. Thanks for being part of my life, thanks for being there whenever I need you.

Finally, a big thanks to Dr. Gelfond, the person that received me and hired me as a research assistant in Texas Tech University. My dream to study a Ph.D. was realized, because he gave me that opportunity. His talks and comments are always very usefull.
